The easiest way for your kids to get quality braces at good prices will be through this website:

www.betterbraces.com/jointheclub

They will need to create an account and enter the club code: **club131**

This will give you a significant discount applied in cart. For example the **DonJoy Velocity Extra Support Ankle Brace** retails at \$99 but with the club code costs \$58.80. Your basic lace up with straps brace, the **DonJoy Stabilizing Pro Ankle Brace**, retails at \$33.99 but with the club code costs \$16.99. These are the two braces I would recommend. The second one comes in both black and white. The **DonJoy Stabilizing Pro Ankle Brace** is the minimum in support I'd recommend for any athlete and you won't find a better price.

This is very easy and works like this. The student/parent orders the brace, pays for it, and it's shipped to them. If they order a Velocity, they just need to let us know when it comes in and I'll set a time for the rep to come by and mold the foot plate for them (it can be worn as is out of the box as well). I have an example of the **Velocity Extra Support and Stabilizing Pro** in my office.

You just can't get it cheaper than this at this quality. Let me know if you have any questions.
