Feeder Team Testimonials

"Playing in the feeder team through the years allowed me a chance to grasp the fundamentals that the Marquette coaches preach. It helped lay the foundation that ultimately led to the championship teams we had. It also was a great opportunity to get to know the coaches and what the program stands for. I highly recommend that kids try out because it will only benefit them athletically and socially. Finally, if you want to hit big shots like Mitch Cox then you better start at a young age." - Ryan Rosburg, Class of 2012

"The feeder program helped me learn the principles of what Mustang basketball is all about. The feeder program allowed me to build the chemistry that I have with my current teammates today." - R.J. Drury, Class of 2015

"The program helped me with my ability to learn the game. Having the high school coaches and sometimes older players helping at practice made me want to listen to everything that was said so that I could learn the game as well as they did. Also, it made me feel like I was a Mustang and part of the basketball family before I was even in high school. Your teammates become your family and you make bonds that last forever." - Sam Ploeger, Class of 2013

"The Mustang feeder program helped me develop and build relationships with my teammates that I have now. I also got to see what it was like to be coached by a varsity coach and do varsity drills. It helped me to figure out where to start when it came to setting my goals as a basketball player." - Brooks Gerrity, Class of 2014
