The Alaska All Stars 8U Mite Development Program has been established with the goal of developing young hockey players by focusing on the development of skating skills, fundamental abilities, and a true love for the game of hockey. Teams of young players will be grouped together with a quality coaching staff to work with them on age/ability specific individual skills and team development. It is our goal as an association to provide the very best environment and opportunity for your kids to learn and develop a passion for the game of hockey and to follow the guidelines USA Hockey has established in the American Development Model (ADM).
