

## **New UAA Clock Instructions (Nov 2012)**

### Penalties:

1. There is a "Delete Penalty" button. As before you still have to scroll to the actual penalty, but you can delete by pushing the button.
2. There is also a default button for major and minor penalties.
3. There is an option for putting the player number with the penalty, which when you have to stack penalties will show you who is next in line to go out and how much the others still have to wait.

### Shots on Goal:

1. You can keep track of them by pushing the button + or -.

This is a wireless system. When you boot it up there is a delay while the scoreboard and console connect. Do not despair, but don't wait until the last minute for your keepers to get in the box. There is a short cycle when there are some intelligible things lighting up, do not pull out your hair that also goes away.

Home and guest are the default so do not post other things in their place. If that happens at all the association hosting will be notified.
