

Interleague Playoff Seeding

If a lower league is playing a higher league in inter-league play, it will not affect their playoff seedings unless all teams play the same teams during inter-league play.

All 18 + National League inter-league games will count in standings.

The 25+ & 35+ Leagues inter-league games will not affect their standings because they are not playing the same teams in inter-league play (decided before season started).
