CYO TEST AND TRACE POLICY

In response to the New York City Parks Department's request as well as Diocesan guidelines, CYO has developed the following policy to ensure the health and well-being of all the CYO community:

CYO currently uses a game roster for CYO events. It is signed by each player, coach and volunteer in attendance.

Parents/guardians are responsible to monitor the health of their child, including a temperature check and general observation for symptoms prior to arriving at the field of play. All CYO staff, coaches, volunteers, officials and attendees will complete a screening questionnaire prior to each event. This form will be posted to our website.

In the event a player develops symptoms and tests positive for COVID-19 following participation in a game, the parent/guardian **MUST** report this positive result to the coach. The coach will inform the parish representative, who will advise the CYO office.

The following will then be notified of the positive case:

- The pastor of both parishes of the teams that played;

- The parish representative and the coach of the opposing team;

- The parents/guardians of all players on BOTH teams;

- The game officials;

- The principal of each school that the participating children attended.

The parents will also need to provide ALL contact information for the child during the period between the game and the diagnosis.

The player will need to quarantine for 14 days and cannot return to play until **MEDICALLY CLEARED** of the virus.

In the event a staff member, coach, official or attendee develops symptoms or tests positive for COVID-19, we will follow the same protocols as described above.
